ALEJANDRO HENNESSEY

Product Designer | UI/UX | Complex Web Products

Toronto, Ontario, Canada | 226-582-4622 | arhennesseyco@gmail.com | alejandrohennessey.art

PROFESSIONAL SUMMARY

Product Designer who makes complex software clear and usable, carrying work from understanding the problem through implementation and review. I design for multiple user roles, map flows, prototype in Figma, and stay with the work through engineering review and launch. Proven impact: redesigned an e-commerce purchase experience that lifted average order value 58%, and built a B2B sales portal connecting clients and sales teams. Data-informed, open to critique, and a clear written communicator in distributed teams. Drawn to mission-driven education technology. Native English and Spanish.

CORE SKILLS

Product Design: Interaction design, user flows, wireframes, prototyping, design systems and components, responsive layouts, edge cases and states, UX writing
Research and Data: User feedback, funnel analysis, analytics, learning from real use to inform the next design decision
Tools: Figma, Shopify, Adobe Photoshop, Illustrator, InDesign, After Effects, Premiere Pro, AI tools for exploration and prototyping
Collaboration: Developer handoff, implementation review, design critique, clear written communication, distributed teams

PROFESSIONAL EXPERIENCE

Founder / Product Designer | KitLabFS

Remote | *Mar 2026 - Present*

- Designed and launched an online store with 1,200+ products and 7,822 variants, owning product pages, funnels, checkout and inventory flows for 450,000+ visitors in the first three months.
- Redesigned the purchase experience and raised average order value 58% while growing to 550+ orders.
- Tracked conversion at every funnel stage (23.7% cart, 10.4% checkout, 3.8% completed sale) to pinpoint drop-offs and prioritize each design iteration.
- Led a five-person team (two developers, two designers, one marketer): set priorities, reviewed builds, and fixed broken or confusing interactions before and after release.

Product Designer | Ballycorp

Ontario, Canada | *Dec 2024 - Sep 2026*

- Designed the company website and a sales rep portal over 21 months, connecting two user groups, clients and sales reps, in one place.
- Mapped end-to-end workflows for each user role, covering permissions, empty states, errors and confirmations, and turned them into Figma flows and interactive prototypes.
- Documented intended behaviour, edge cases and decision notes so developers could build without a live walkthrough, then reviewed implementations and logged fixes.
- Gathered feedback from sales and operations stakeholders through regular conversations and used it to simplify screens, labels and hierarchy in each release.
- Kept components and patterns consistent across the website and portal so design and the built product stayed aligned.

Co-op, Junior Product Designer, Product Designer | LCBO

Toronto, Ontario | *Sep 2023 - Nov 2024*

- Earned two promotions in 14 months: co-op (Sep-Dec 2023), Junior Product Designer (Jan-Aug 2024), Product Designer (Aug-Nov 2024).
- Designed digital product experiences in Figma, from wireframes to high-fidelity prototypes, within a larger cross-functional team.
- Sought critique early, then iterated on team and stakeholder feedback to improve clarity before handoff.
- Took on greater scope with each promotion, moving from guided tasks to owning defined product work independently.

EDUCATION

Graphic Design Advanced Diploma | Fanshawe College | 2022 - 2025

LANGUAGES

English (native) | Spanish (native) | French (basic)
